

DataSure

Simple. Secure. Affordable. Professional remote backup.

DataSure contains many powerful, easy to use features – providing encryption backup tools previously utilized only by Fortune 500 companies, with an interface designed for all companies, small, medium or large.

Remote Data Backup Features:

Security & Encryption	With DataSure, your data is always secure. Backup files are encrypted using a variety of state-of-the-art encryption options and stored in secure online data backup centers.
File compression	DataSure uses maximum data file compression technology to ensure that both your bandwidth and storage usage are minimized without compromising file recovery methods.
Data Backup Sets	Setting up data backups is simple. Choose the organization method that works best for you: folder name or file type. With unlimited backup sets included, we give you complete control over securing your data.
Unlimited File Versions	Ever wish you could go back to last Monday's version? With DataSure, you can. Our online data backup service stores an unlimited number of versions of the same file and with advanced revision rules, managing updates is easy.
Restore Files 24/7	Backed up data is most valuable when it can be restored quickly and easily. With DataSure, restoring files can be accomplished on-demand in just a few clicks.
Logs & Reports	Be sure your online backups are successful. Via email, DataSure sends logs and reports, that let you know what was backed up, when it was backed up and how much storage space you are using.
Multiple Computers & Mapped Drives	Need to backup more than one computer or multiple office sites? With a custom DataSure package, you have the option to backup multiple computers in multiple locations, for easy maintenance and file recovery. DataSure also allows you to backup mapped drives.
Support for Microsoft® Exchange & SQL Servers	DataSure gives you the power to perform a secure online data backup of your critical Microsoft Exchange and Microsoft SQL databases all using file encryption backup methods for safety and security.
Free Support	We're here when you need us. DataSure includes free, unlimited customer support via email or phone.
